Complete first aid repair set

Dear customer,

Of course it is not necessary, but sometimes could be useful to have a first aid repair set, with a few basis parts, for a trailer with a Cargo Floor system in order to swiftly and at no cost adequately solve a malfunction when you are at a loading or unloading site.

For this Cargo Floor has put together a first aid tool set with parts and wrapped it in a roll bag that has been especially made for this. Off course this bag can be stored anywhere, but there is also the possibility to order a toolbox that can be locked (parts number: [5615106](#)) with a mounting bracket (parts number: [5154014.01](#)). The toolbox can be mounted under the trailer at any spot.

The tools and parts "first aid" for Toolbox Cargo Floor has parts number: [6415105](#).

If you are interested please contact our [sales support](#) department.

Trusting to have informed you sufficiently, we remain,

With best regards,

Cargo Floor B.V.
Coevorden, The Netherlands
