Conc.: new Cargo App remote control set

Dear customer,

As you know the developments in the technical area never come to a halt and therefore Cargo Floor has developed a new remote control. With this you can operate the Cargo Floor system comfortably and at distance.

This newest App remote control set is as a standard equipped with the latest technology. On very short notice you will also be able to operate your Cargo Floor system via an App on your smartphone. We will be presenting this at the upcoming IAA fair in Hannover, Germany.

Also this new App remote control set has more comfort, among which button lighting, also the battery can be charged with the charger and USB cable that are also supplied with it.

The complete standard remote control set, [parts no. 6104008](#), consists of:

Remote control transmitter,
[parts no. 6104025](#)
with button lighting and
battery indication

App-receiver,
[parts no. 6104023](#)
which has the same connection plug
that will fit your current control box
switch (exchangeable).

USB charger plug

USB charger cable

USB car charger

There are also Cargo App-receivers available with which you can operate 10 functions and the App-receivers can modularly via the CAN bus connector be extended endlessly.

The new App remote control set will be supplied automatically as of now and will serve as a replacement for the version ([parts no. 6104006](#)) supplied thus far.

Trusting to have informed you sufficiently, we remain,

With best regards,

Cargo Floor B.V.
Coevorden, The Netherlands

YOUR CARGO TEAM
